

# FACE AND BODY PAINTING

## FACE THE FACTS

If a picture's worth a thousand words, than a picture on your face is worth a million. If you're looking to brighten up your special event, than Face Painting and Body Art will add color and conversation.

For grand openings, company picnics, holiday parties, Mardi Gras Celebrations and parties themed around Halloween or Carnivale, adding a face painter to your event will guarantee a success.

## THE EYES HAVE IT

Our professional artists specialize in face and body art for children and adults. Flowers, unicorns, rainbows just begin the list of potential designs. Imagine a shark painted on the face of a boy, its mouth coinciding with his. A vine growing up a woman's arm. A dragon on a man's chest. The artist often incorporates your guests' physical characteristics into their art, personalizing the creation for each individual.

## SAFE AND WASHABLE

The paints are safe and non-toxic. The artwork will last for a few days, but can be washed off with soap and water after the event if you wish. But before you apply the washcloth, take a digital picture and you'll have a memory to of your special occasion to keep forever.
